MATÉRIAU

La receveurs de douche est fabriquée en Quaryl®. C'est un matériau de synthèse de haute qualité, coloré dans la masse et présentant une surface extrêmement dure.

ENTRETIEN

Nettoyage

Pour conserver toute la beauté de votre receveurs de douche, nettoyez-la régulièrement avec un nettoyant liquide (Soleil Citron, Lux, Sunlight, Mr. Propre, Clean ou autre) et une éponge ou une brosse douce. Si vous avez une baignoire dans une finition mate, rincez-la avec du savon et beaucoup d'eau.

Nettoyage des taches tenaces

Les taches tenaces pourront être enlevées à l'aide d'une éponge trempée dans un abrasif liquide (tel que Cif, Vif), dilué toutefois dans un peu d'eau. N'utilisez jamais d'autre type de produit abrasif.

Pour enlever les taches de calcaire, utilisez une solution vinaigrée.

Résistance aux produits chimiques ménagers

Les receveurs de douche en Quaryl® offrent une résistance totale à tous les produits chimiques ménagers habituels, qui ne peuvent pas en attaquer la surface.

Réparation de dégâts

Si votre receveurs de douche est endommagée, il est, dans certains cas, possible que notre service après-vente répare ce dégât. Le cas échéant, contactez notre organisation de vente.

GARANTIE

MATERIALE

Questa piatti doccia è prodotta in Quaryl®, un materiale sintetico di alta qualità, colorato in tutto il suo spessore e caratterizzato da una superficie dura.

MANUTENZIONE

Pulizia

La piatti doccia mantiene al meglio le sue qualità estetiche, se la pulite regolarmente con un detergente fluido universale (Andy, Ajax, o simili) ed una spugna o una spazzola morbida. Se possedete una vasca di un colore opaco, vi consigliamo di pulirla con sapone e abbondante acqua.

Rimozione di macchie difficili

Le macchie più ostinate possono essere rimosse con una spugna ed un detergente liquido abrasivo (come Cif, Jif), diluito con acqua. Non usate altri detersivi abrasivi! Per sciogliere le macchie di calcare, vi consigliamo di usare una soluzione di aceto o acido citrico.

Resistenza alle sostanze chimiche di uso domestico

La superficie delle piatti doccia Quaryl® resiste perfettamente all'azione di tutte le sostanze chimiche di comune uso domestico. Riparazione dei danni Alcuni tipi di danni alle vasche da bagno possono essere riparati dai nostri tecnici. Pertanto, in caso di danneggiamento della vostra vasca, contattate la nostra organizzazione vendita.

MATERIAAL

Deze douchebak is gemaakt van Quarry®. Dit is een hoogwaardige kunststof, die door en door gekleurd is en een hard oppervlak heeft.

ONDERHOUD

Reiniging

Uw douchebak blijft op z'n mooist als u dit regelmatig met een vloeibare allesreiniger (Andy, Ajax, e.d.) en een spons of zachte borstel even reinigt. Als u een mat gekleurd bad heeft, dan kunt u dit het beste reinigen met zeep en veel water.

Verwijderen hardnekkige vlekken

Hardnekkige vlekken kunt u verwijderen met behulp van een spons met een vloeibaar schuurmiddel verdund met water (zoals Jif, Cif). Gebruik dus geen andere schuurmiddelen! Voor het verwijderen van kalkvlekken kunt u het beste een azijnoplossing of citroenzuur gebruiken.

Bestand tegen huishoudchemicaliën

Het oppervlak van de Quarry® douchebakken is uitstekend bestand tegen alle normaal in het huishouden voorkomende chemicaliën.

Herstellen van beschadigingen

Wanneer uw douchebak beschadigd is, dan is het in bepaalde gevallen mogelijk deze schade weer te laten herstellen door onze servicemonteurs. Neemt u hiervoor contact op met onze verkooporganisatie.
