## Blue stone

Blue stone is perhaps the most common type of natural stone. Under blue stone is a wide collection of blue-gray, compact limestone that more than 300 million years ago have been formed. It is a sedimentary rock. Typical of the stone are the numerous fossils in the stone silhouetted.

\*Honed (matt surface)

## Basalt

Basalt is the most common volcanic rock on Earth. It is an igneous rock formed by the cooling and solidification of molten rock (magma). Because of the rapid cooling the various minerals in the magma do not have enough time to form large crystals. The crystals of minerals such as olivine, pyroxene and feldspar in a basalt, are therefore usually too small to be able to observe with the naked eye. Often the ascending magmas not reach the earth's surface and solidify all in the crust. The rock that emerges called 'deep rock ', and takes with ease diameters of tens to hundreds of kilometers.

\*Honed (matt surface)

\*Rockfaced (very rough surface)

## Travertine

Travertine is formed by the precipitation of lime from water from hot springs. Twigs, leaves and other material that falls into the water and consume later, causing the characteristic irregular pores of this material. So travertine has from origin an open structure. In the production, the sinks little holes are filled and brushed afterwards to get a smooth surface. These fillings are often visible, but that's what makes travertine such a unique type of natural stone!

\*Honed (matt surface)

## Black granite

Granite is an igneous rock that consists of three minerals, namely quartz, feldspars and micas (mostly biotite). It is the most common deep rock within the earth's crust and is mined in many countries. It originated from solidified magma underground. (This is in contrast to a basalt as that above-ground has been solidified). The ratio of the minerals varies, but usually quartz is the dominant component.

\*Honed (matt surface)

\*Polished (shiny surface)

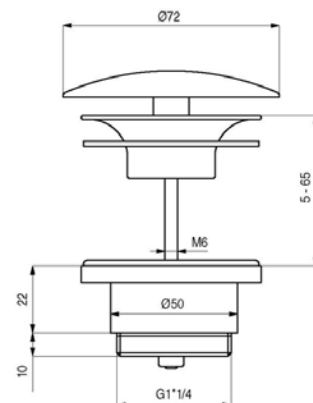

\*Rockfaced (very rough surface)

## Waste chrome 5/4'' open

Product no. 700001  
Universal sink drain plug for sinks with or without overflow.

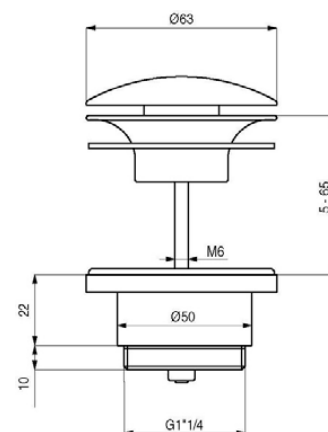

With fixed, gloss chrome-plated cover and cylindrical adapter.

## Waste chrome 5/4'' clic-clac

Product no. 700002

Universal sink drain plug for sinks with or without overflow.  
Equipped with Up & Down locking mechanism and gloss chrome cylindrical adapter.

Very special brackets, handmade. You cannot see any mounting holes. The oak is sealed for bathroom use. Beautiful to combine these brackets with a natural stone plateau or oak plateau. Also wonderful to combine with all the Palermo sinks.

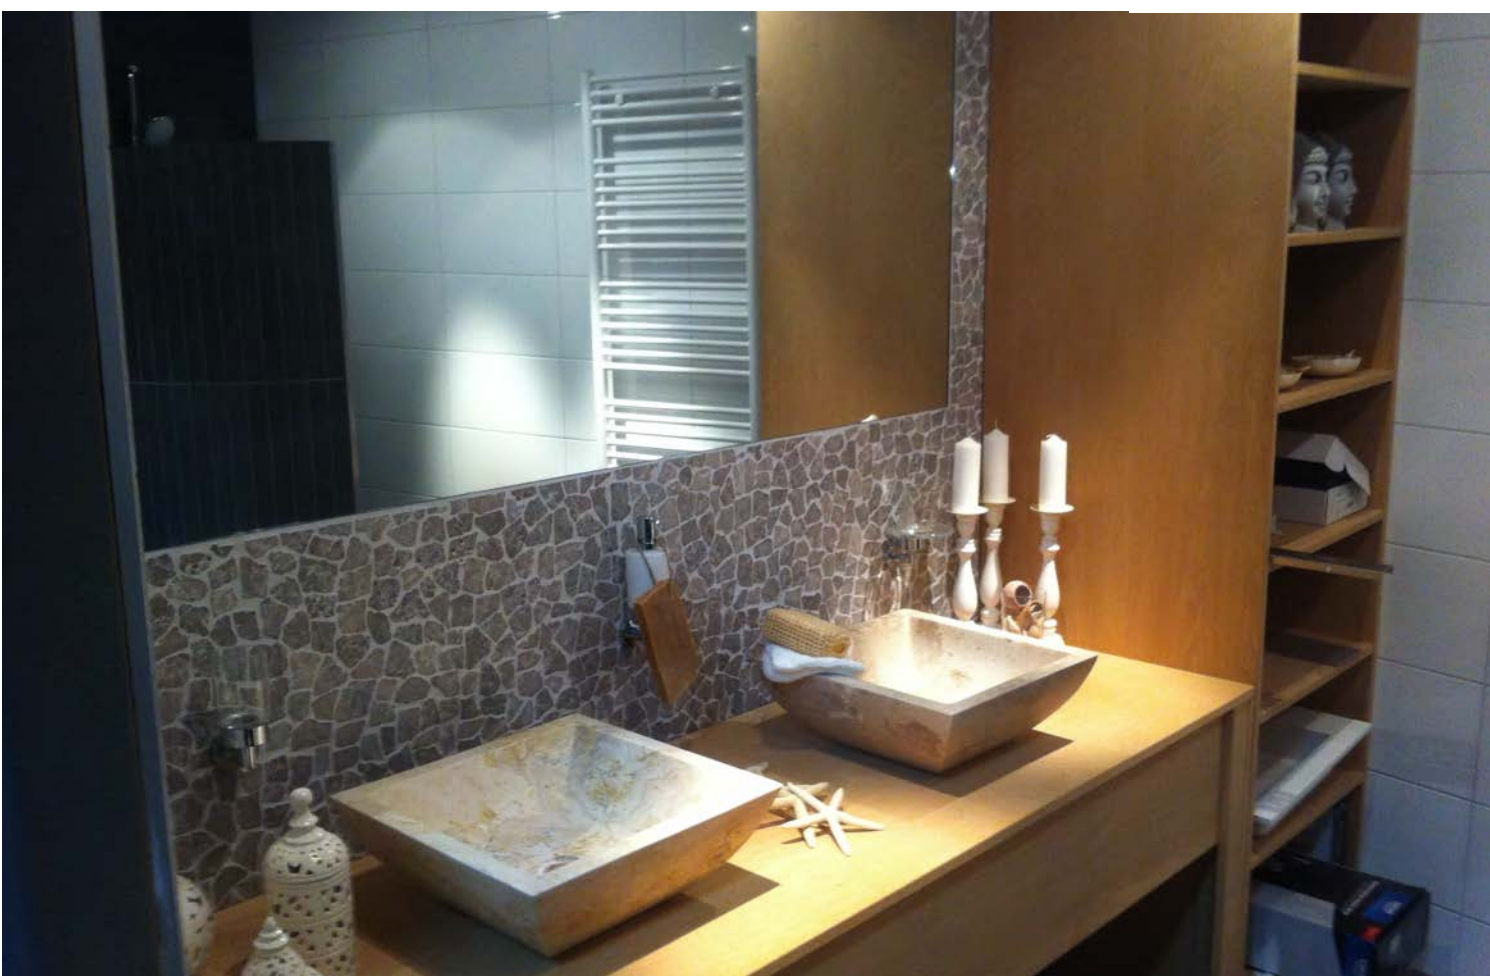

## Stainless steel brackets (38cm)

Product no.	200008
Product name	Stainless steel brackets
Installation	Wall hung through mounting holes
Hanging	Through mounting holes
Form	Rectangle
Size (cm)	38x15x3
Material	Stainless steel
Weight (kg)	3

These brackets are wonderful to combine with all the Palermo sinks.

## Stainless steel frame

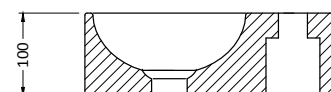

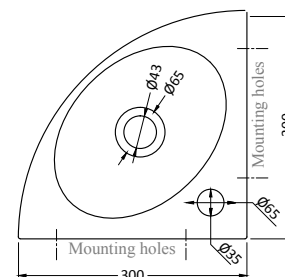

Product no.	500015
Product name	Stainless steel frame
Form	Rectangle
Size (cm)	160x60x80
Material	Stainless steel

This frame is made for the Napoli natural stone basin.

## Turino blue stone

Product no.	100021
Product name	Turino blue stone
Installation	Wall hung
Hanging	Through mounting holes provided
Form	Triangle
Size (cm)	30x30x10
Material	Blue stone
Weight (kg)	15
Taphole	Yes
Inside finishings	Matt brushed
Outside finishings	Matt brushed
Drain hole size	Universal

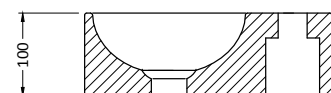

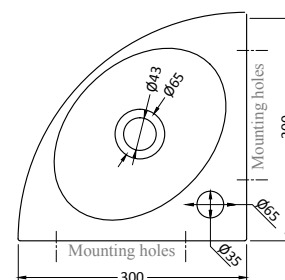

Beautiful natural stone wall hung corner cloakroom basin, exclusive design and made of one piece natural stone. This model is also for sale in another type of material: Basalt G684. This cloakroom basin can be hung through the mounting holes provided. Blue stone shows often its antiquity! Fossils that are centuries old reappear in this cloakroom sink

## Turino basalt

Product no.	100022
Product name	Turino basalt
Installation	Wall hung
Hanging	Through mounting holes provided
Form	Triangle
Size (cm)	30x30x10
Material	Basalt G684
Weight (kg)	15
Taphole	Yes
Inside finishings	Matt brushed
Outside finishings	Matt brushed
Drain hole size	Universal

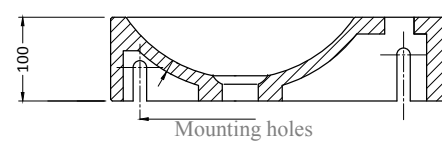

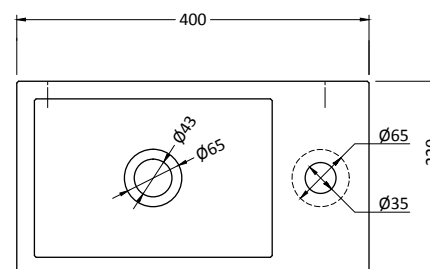

Beautiful natural stone wall hung corner cloakroom basin, exclusive design and made of one piece natural stone. This model is also for sale in another type of material: Blue stone. This cloakroom basin can be hung through the mounting holes provided.

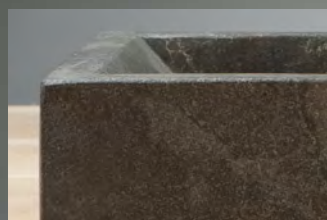

## Venetia blue stone (taphole right side)

Product no.	100074
Product name	Venetia blue stone
Installation	Wall hung
Hanging	Through mounting holes provided
Form	Rectangle
Size (cm)	40x22x10
Material	Blue stone
Weight (kg)	17
Taphole	Yes, on the right side (also available on the left side: 100075)
Inside finishings	Matt brushed
Outside finishings	Matt brushed
Drain hole size	Universal

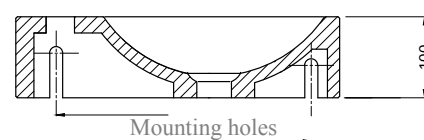

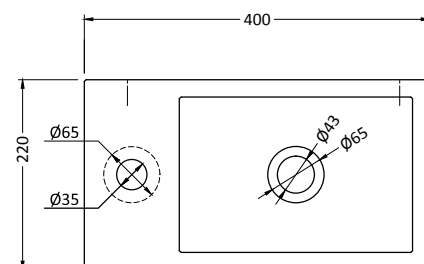

Beautiful natural stone wall hung cloakroom basin, made of one piece natural stone. This model is also for sale in another type of material: Basalt G684. This cloakroom basin can be hung through the mounting holes provided on the side. Blue stone shows often its antiquity! Fossils that are centuries old reappear in this cloakroom sink

## Venetia blue stone (taphole left side)

Product no.	100075
Product name	Venetia blue stone
Installation	Wall hung
Hanging	Through mounting holes provided
Form	Rectangle
Size (cm)	40x22x10
Material	Blue stone
Weight (kg)	17
Taphole	Yes, on the left side (also available on the right side: 100074)
Inside finishings	Matt brushed
Outside finishings	Matt brushed
Drain hole size	Universal

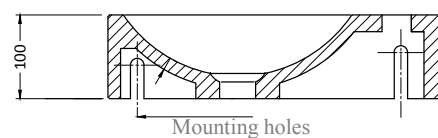

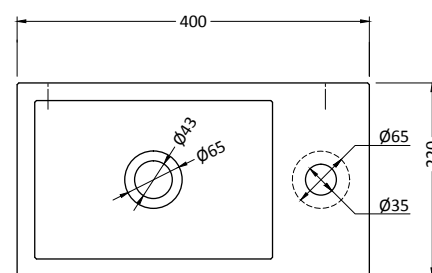

Beautiful natural stone wall hung cloakroom basin, made of one piece natural stone. This model is also for sale in another type of material: Basalt G684. This cloakroom basin can be hung through the mounting holes provide don the side. Blue stone shows often its antiquity! Fossils that are centuries old reappear in this cloakroom sink

## Venetia basalt (taphole right side)

Product no.	100076
Product name	Venetia basalt
Installation	Wall hung
Hanging	Through mounting holes provided
Form	Rectangle
Size (cm)	40x22x10
Material	Basalt G684
Weight (kg)	17
Taphole	Yes, on the right side (also available on the left side: 100077)
Inside finishings	Matt brushed
Outside finishings	Matt brushed
Drain hole size	Universal

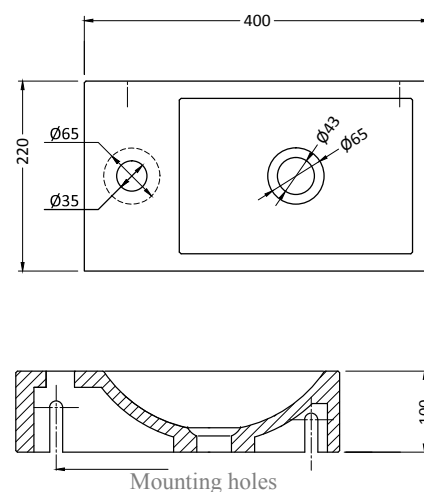

Beautiful natural stone wall hung cloakroom basin, made of one piece natural stone. This model is also for sale in another type of material: Blue stone. This cloakroom basin can be hung through the mounting holes provided on one side of the sink.

## Venetia basalt (taphole left side)

Product no.	100077
Product name	Venetia basalt
Installation	Wall hung
Hanging	Through mounting holes provided
Form	Rectangle
Size (cm)	40x22x10
Material	Basalt G684
Weight (kg)	17
Taphole	Yes, on the left side (also available on the right side: 100076)
Inside finishings	Matt brushed
Outside finishings	Matt brushed
Drain hole size	Universal

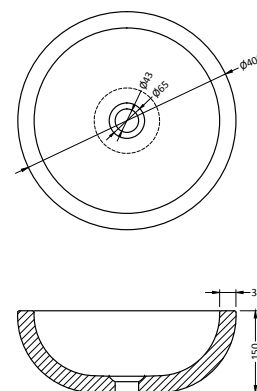

Beautiful natural stone wall hung cloakroom basin, made of one piece natural stone. This model is also for sale in another type of material: Blue stone. This cloakroom basin can be hung through the mounting holes provided on one side of the sink.

## Roma blue stone

Product no.	100001
Product name	Roma blue stone
Installation	Countertop
Form	Round
Size (cm)	40×15
Material	Blue stone
Weight (kg)	17
Taphole	No
Inside finishings	Matt brushed
Outside finishings	Matt brushed
