

WASHLET

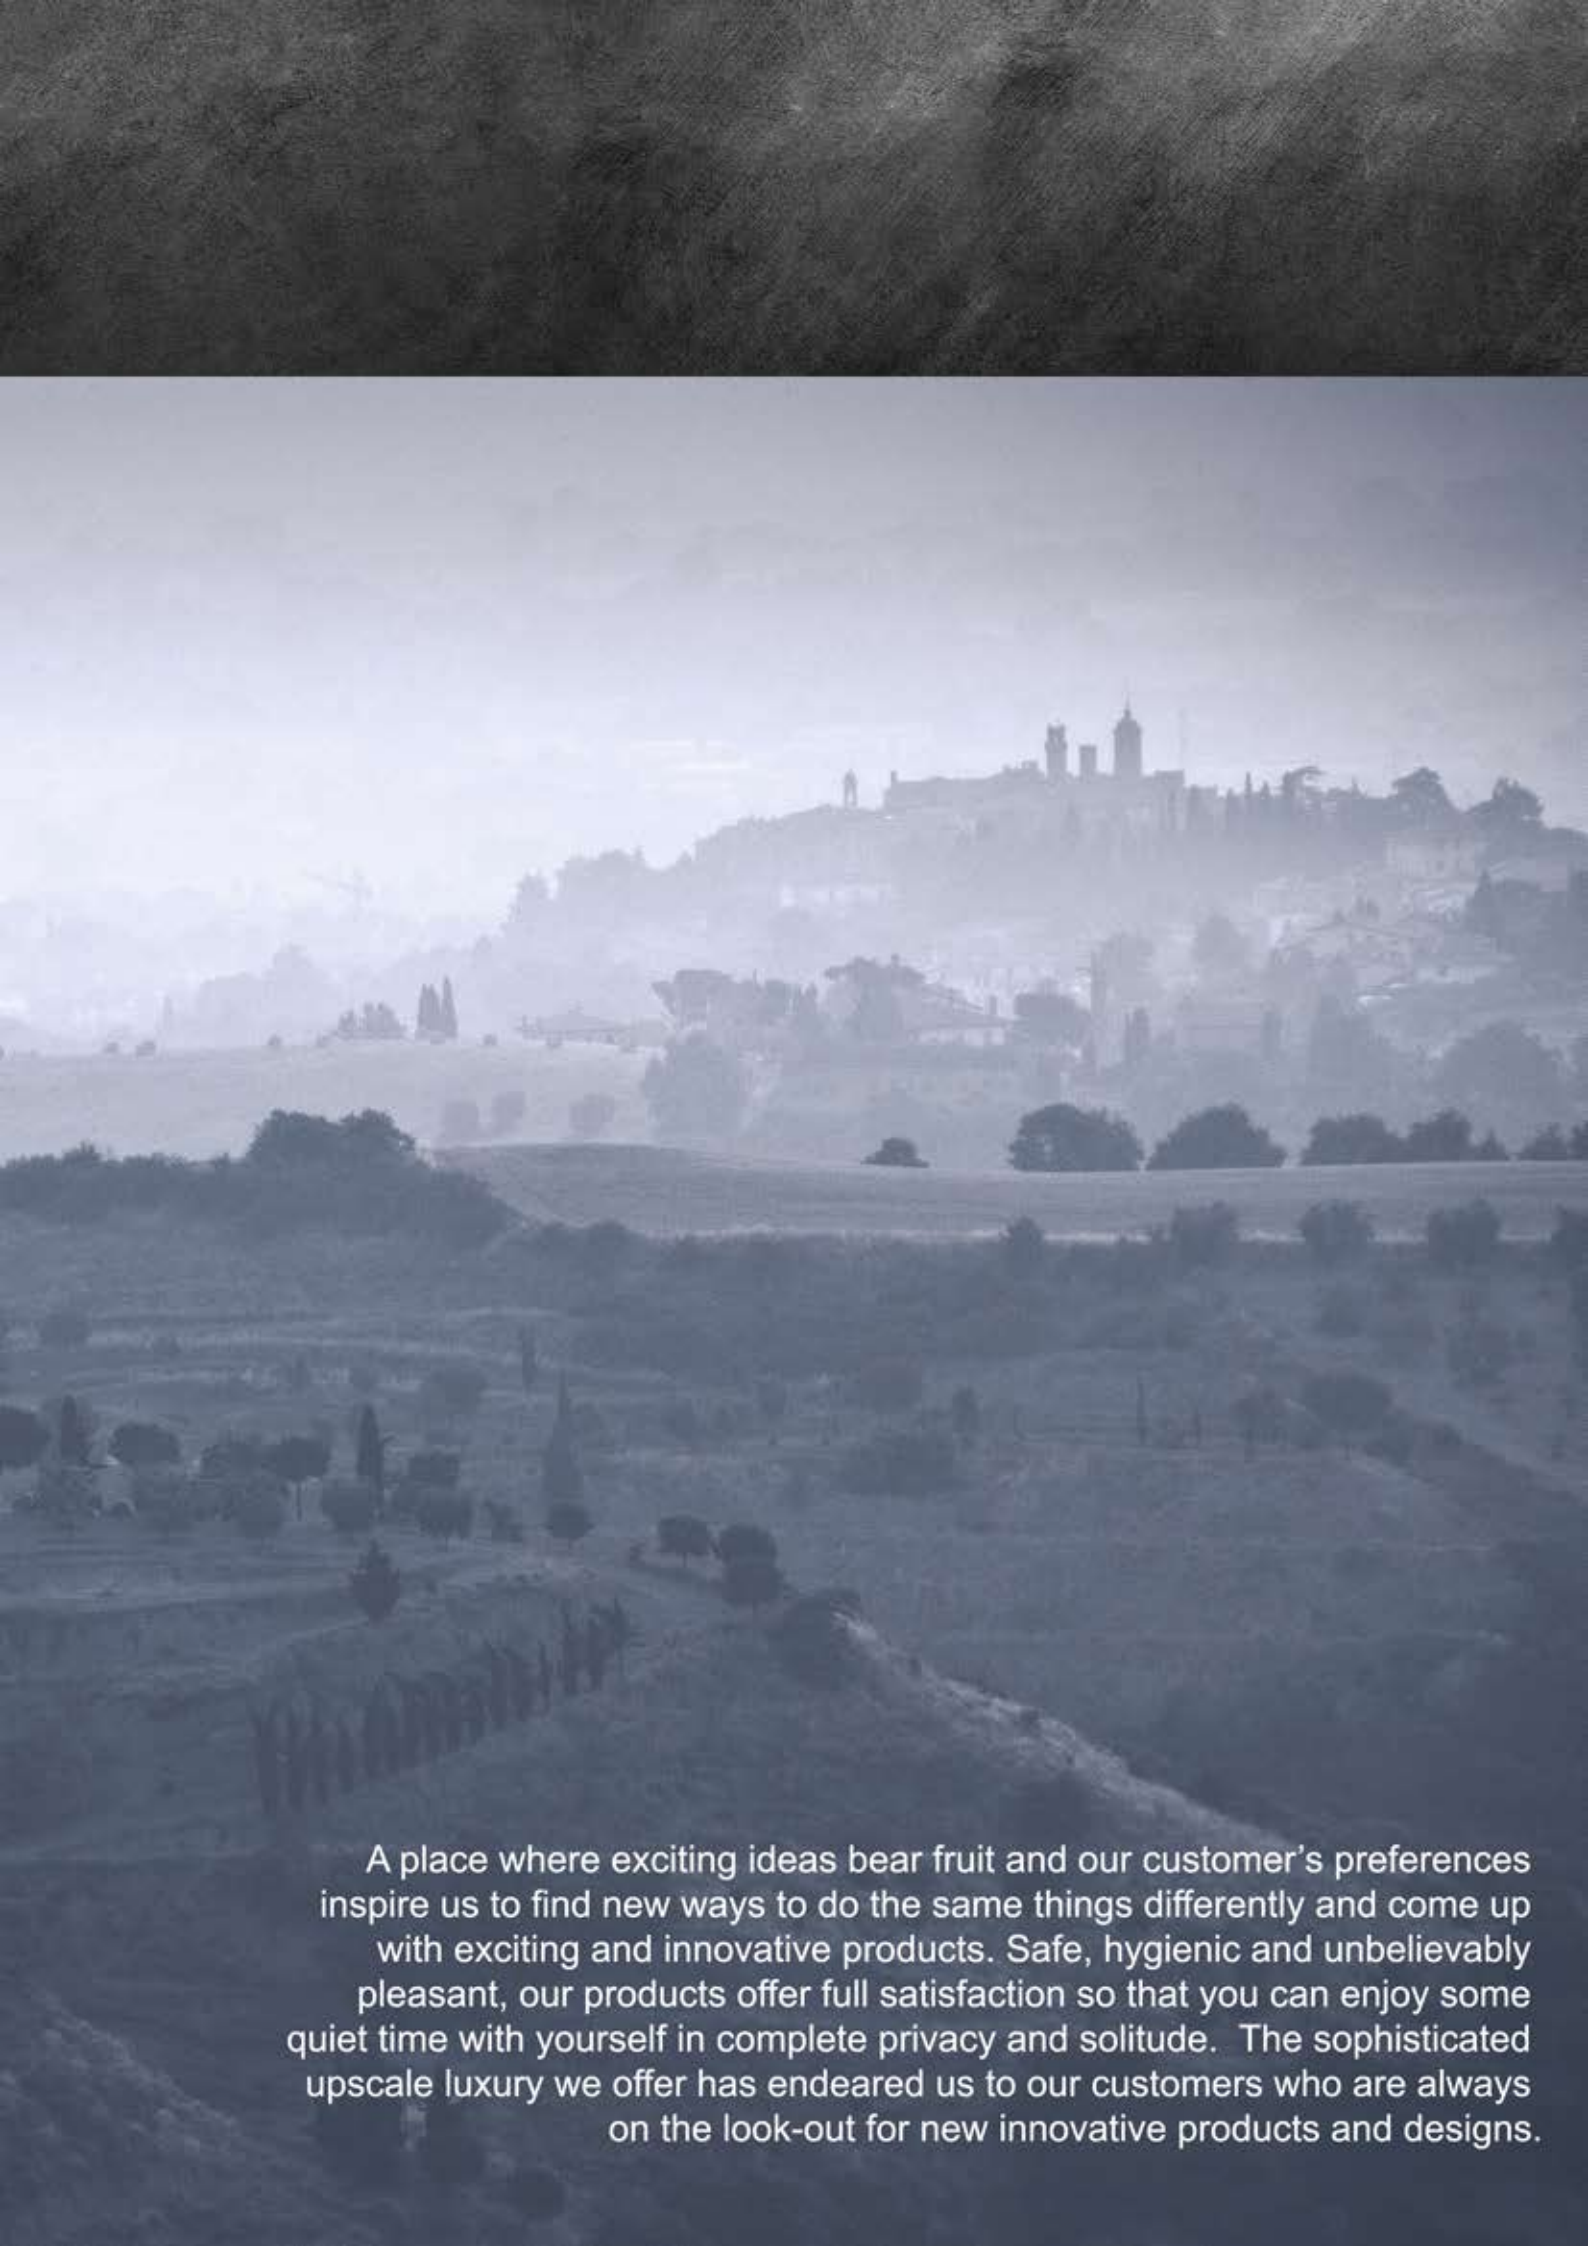

DI600

About us

Welcome to Maro D'Italia - first Washlet manufacturer in Italy.

A place where exciting ideas bear fruit and our customer's preferences inspire us to find new ways to do the same things differently and come up with exciting and innovative products. Safe, hygienic and unbelievably pleasant, our products offer full satisfaction so that you can enjoy some quiet time with yourself in complete privacy and solitude. The sophisticated upscale luxury we offer has endeared us to our customers who are always on the look-out for new innovative products and designs.

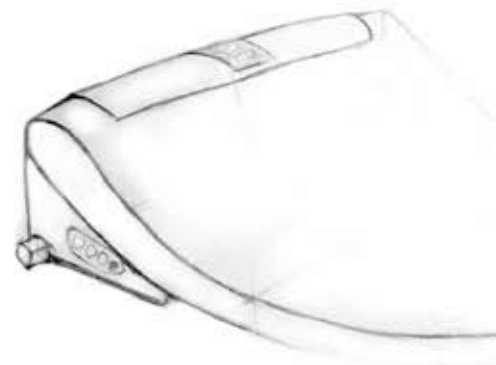

What is washlet

A bit about our washlets...

Washlets are more convenient than traditional toilets, since they clean your inner-parts with a soothing spray of water while you remain seated on the toilet. It will clean you automatically with heated water and dry you with hot air.

- Containing a hand-triggered nozzle that throws a spray of water, it ensures that your personal parts remain clean.
- These washlets are equipped with remote control functions in case the user has mobility problems and someone else is initiating the functions of the bidet seat.

These shower-toilets also come with a mounted control panel that is stationed on the seat itself, in case there is a remote failure. Some of these models also come with a deodorizer that is activated by a seat sensor.

Why use it

For decades, we have been the industry leader in the design and manufacture of sophisticated toilets and seats. Our initiatives have raised the standard of excellence in the sanitary space since we have introduced water-efficient designs and integrated innovative technologies into our product range. And in doing so, we have redefined the idea of personal comfort and cleanliness.

We take each of the above listed points seriously to provide our customers unmatched quality and deliverance.

In our interactions with our customers of all backgrounds, we have found one thing common: that all customers desire a clean bowel rinse and efficient water utilization without any spillage or leakage.

How to use it

1. Take a seat on the toilet as you always do.
2. After you are done, press the necessary button for your need, either front cleaning (ladies) or rear cleaning.
3. Press the button DRY (cleaning will automatically stop).
4. After you feel like you are dry enough, stand up and flush the toilet. The sensor in the seat will automatically stop drying and or cleaning, the wash & dry toilet seat will go into stand by-energy saving

Product description

Designed in Italy for best performance

From the comfortable, heated seat to the wireless, intuitive remote control and thinnest design our products are every bit as good as they look. Offering both gentle-cleaning and pleasant drying, our products offer maximum comfort and ultimate user-friendliness.

No wonder our customers find each visit to the toilet a relaxing, rejuvenating experience that makes them afresh once again. Once you get used to our products, you won't live without them again!

Main advantages

Why our products stand out

Our ranges of washlets are a remarkable combination of functionality, comfort and design and have been appreciated by our customers who have displayed great enthusiasm and passion for nearly every kind of product that we have launched. Our latest ranges of washlets are new, improved versions of the toilet-seat where in the water and power connections are elegantly concealed.

- ✓ Antibacterial nozzle for perfect cleaning
- ✓ Soft open/close function
- ✓ Modern touch-sensitive remote controller
- ✓ Choose the combination that suits you best.

Important Feature#1

Maro D'Italia DI 600 impresses with its flawless design and remarkable combination of perfect functionality and comfort. It has all advanced functions one would need in a bidet seat and can be compared with many more expensive models.

Important Feature #2

Unlike previous models, Maro D'Italia DI 600 features an electrical cable which is neatly hidden in the middle of the toilet so it can be wired to the left or to the right side. It features a power cable fuse which prevents a short circuit.

Important Feature #3

Another advantage of this device is the toilet seat which is made of UF material. This is what makes it much more durable than the toilet seats made of plastic, so you can also take a seat on it without having to worry about breakage.

Di600 functions

Warm toilet seat

Heated toilet seat with several temperature settings.

Warm air dryer

The built-in warm-air dryer completely dries you after washing. Temperature can be regulated from cold to warm.

Move nozzle

The position of the nozzle can be adjusted by pressing a button on the remote control.

UF cover

The cover is made of durable material with anti-bacterial coating.

Soft close

The toilet seat and lid have an integrated slow closing function.

Changing water filter

The water filter filter out sand, sediment, and small particles from the water supply before they reach your bidet seat. The filters also help prevent calcium and hard water deposits from building up inside the bidet seat.

Sittable when closed

The toilet cover is strong enough to carry your weight and will not break if you sit on it.

Single nozzle

Single Nozzle System utilizes a "one size fits all" method of cleaning for both feminine and posterior wash.

Electric toilet seat

The toilet seat is electric and plugs into a regular outlet.

Mechanical water filter

Built-in permanent Ag Nano water filter, which cleans the water and makes it anti-bacterial.

Self cleaning nozzle

Nozzles are automatically cleaned.

Power saving

The power consumption is reduced when no one is sitting on the toilet or when no panel control button is pressed for approximately 10 minutes.

Rear wash

Anal washing function.

Remote control

Wireless remote control panel can be mounted on the wall beside your toilet.

Bidet

A bathroom fixture equipped with running water intended for washing the genitals.

Night light

The night light is designed to provide optimal light intensity for guidance without disturbing your night-time vision.

Full Auto Washing

An automatic preset washing function is enabled.

Air in water

Because the skin in that area is more sensitive, air bubbles are added to water. Therefore the water is not rough or tough, but strong enough and pleasant.

Best combo in town

Undoubtedly, the best combo in town

Combining incredible performance with great design, Maro D' Italia offers the best combo in town. Something that you can depend upon for the rest of your life.

MH-WALL HANG

MH-CLOSE COUPLED

MH-FLOOR STANDING

Delivering a surprising range of beautiful, water-saving designs, these washlets offer advanced features for comfort and functionality, apart from a wide range of seat and bidet options.

Get in touch with our team today and you will be guided to the right product range that fits your preference and sensibilities perfectly.

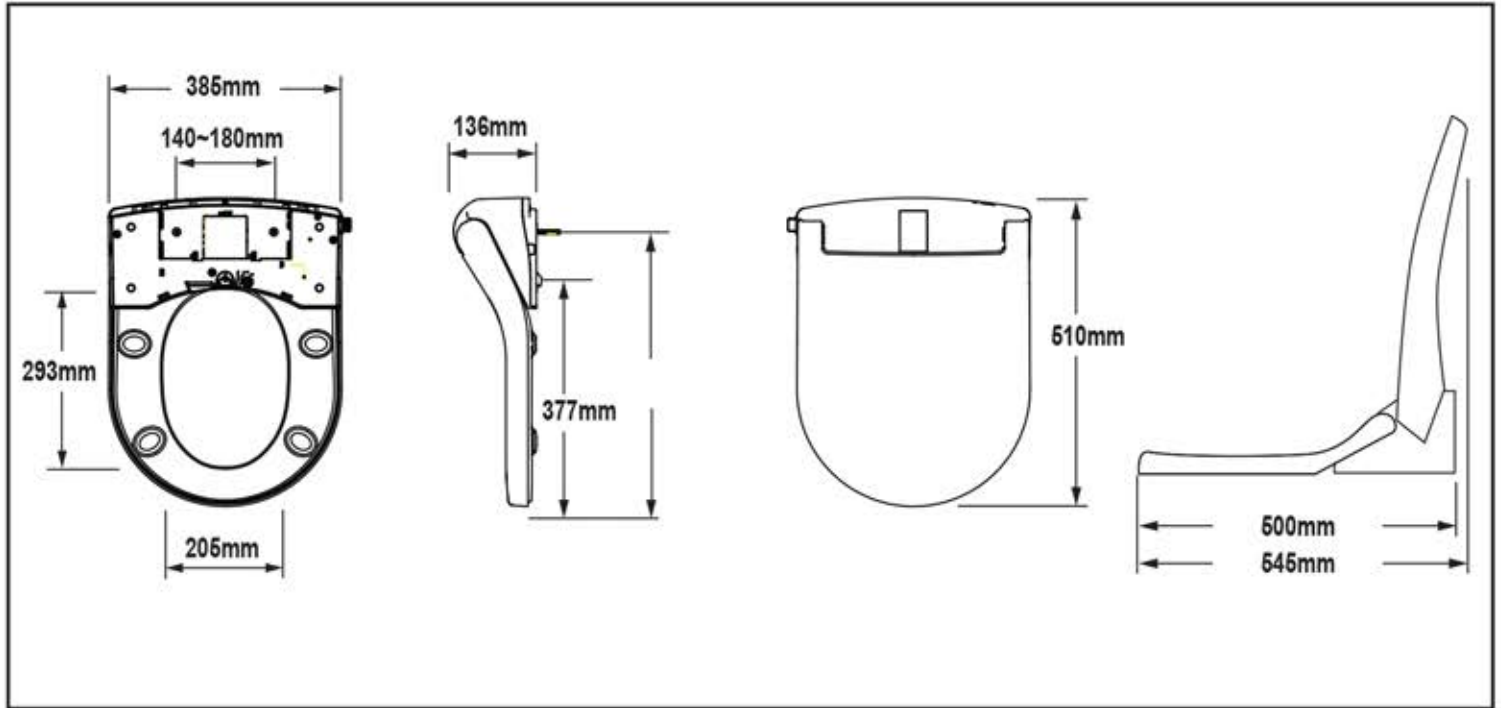

Customers looking to buy the best combination of toilet with bidet seat will definitely find our range appealing and in sync with their preferences. Combining incredible performance with great design, Maro D' Italia offers the best combo in town. Something that you can depend upon for the rest of your life.
