

INSTALLATION INSTRUCTION

VESSEL SINKS WITHOUT OVERFLOW

The vessel sinks can be installed on the countertop and they are available in ceramic, glass, stone and bamboo.

Step 1

Position countertop drain opening to ensure clearance between the lavatory, faucet and backsplash. Cut a hole for drain in the countertop to match the diameter of drain pipe.

Step 2

Apply a bead of silicone around the bottom installation area of vessel sink.

Note: For GLASS VESSEL SINK, there may be a mounting ring to be placed between the sink and countertop.

Step 3

Place the drain and vessel sink into the countertop drain opening and adjust to fit it. Press down to seal the sink on the countertop.
