INSTALLATION IS AN ACCEPTANCE OF QUALITY

V01/03/2017

1. INSTALLATION IS AN ACCEPTANCE OF QUALITY

2. ANY MODIFICATION OR ADAPTION TO THIS PRODUCT WILL INVALIDATE THE GUARANTEE FOR ALL REASONS, OTHER THAN A GENUINE MANUFACTURING FAULT WHICH HAS NOT BEEN CAUSED BY THE MODIFICATION OR ADAPTION

3. THIS PRODUCT IS SUPPLIED WITH FIXINGS SUITABLE FOR SOLID WALLS ONLY. IT IS THE CUSTOMER'S RESPONSIBILITY TO ENSURE THAT THE FIXINGS USED ARE SUITABLE FOR THE WALL THAT THE PRODUCT IS BEING FITTED TO, AND THAT THE WALL IS CAPABLE OF SUPPORTING THE PRODUCT'S TOTAL WEIGHT (SEE PACKAGING FOR GROSS WEIGHT)

Product care advice

1. Take care not to place heavy or sharp objects on the unit or basin - this may damage the surface.

2. Weekly cleaning of the unit is recommended with a clean soft cloth and warm soapy water. Take care not to soak the unit when cleaning - the cloth should only be damp. To clean the basin - use soap or mild detergent - do not use strong acid / alkaline cleaners. **DO NOT USE ABRASIVE LIQUIDS OR ABRASIVE CLEANING PADS TO CLEAN THE UNIT OR BASIN, AS THIS WILL SCRATCH THE SURFACE AND CAUSE THE PRODUCT SURFACE QUALITY TO DETERIORATE!**

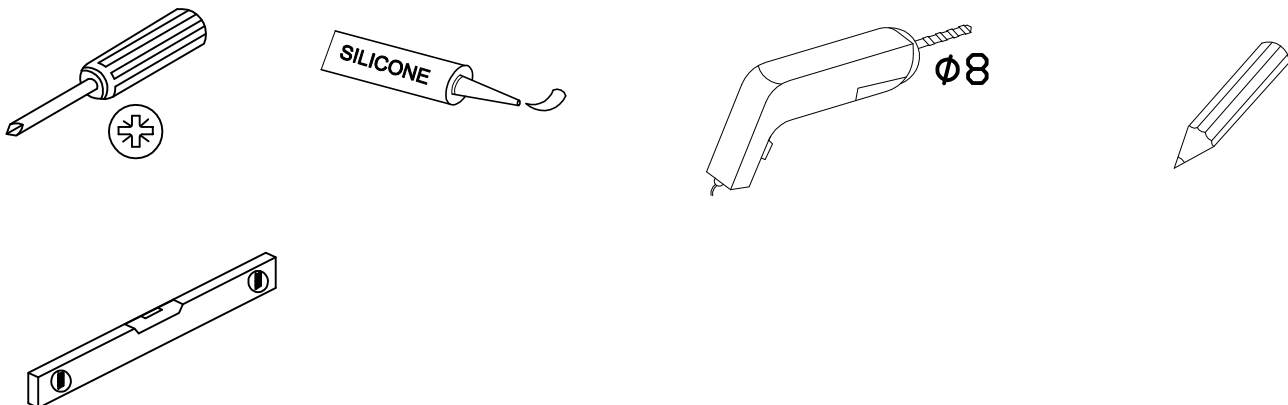

3. After use (and cleaning), be sure to dry the unit with a soft dry cloth - take care to avoid leaving excess water on any part of the unit. Pools of water left on the unit over time can cause surface discoloration and / or water ingress.

4. Do not directly expose the unit or basin to water temperatures of more than 80°C.

5. Try to avoid installing the unit where it may be subjected to long periods of direct sunlight, as prolonged UV exposure may cause surface discoloration.

6. Do not use 'super-glues' to fix any parts together during installation - only use a dedicated silicone sealant where advised to do so.

Tools Required

INSTALLATION INSTRUCTIONS

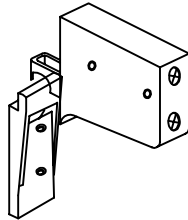

Box Contents:

A

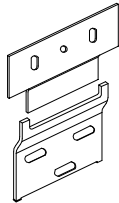

8 x Wall Plugs
8 x Screws

B

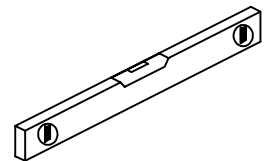

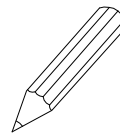

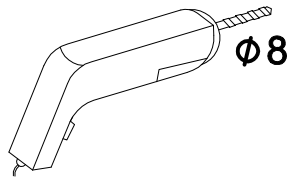

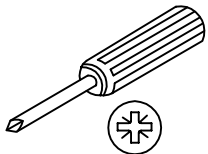

2 x hanging system

C

2 x hanging system

Tools Required

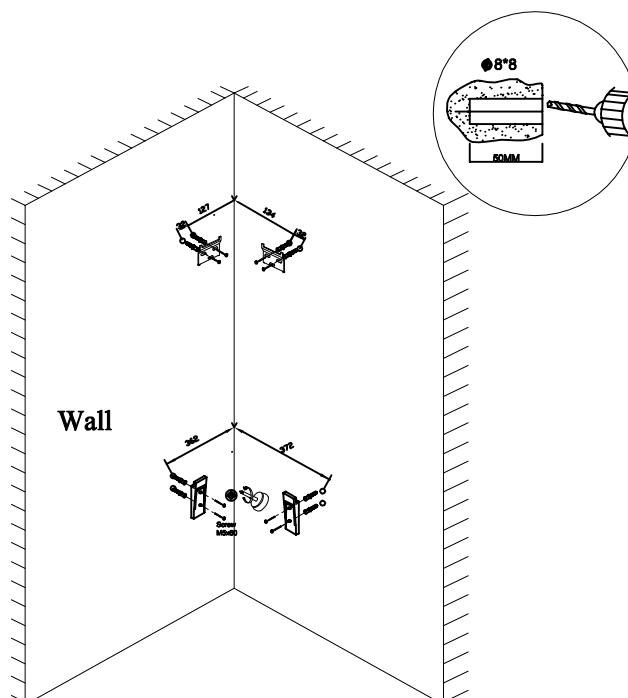

This product is heavy and may require two people to install.

Installation Steps

Installation Steps

Step 2

It is very important to ensure that the unit (either floor standing or wall mounted) is level & plumb, using a spirit level. This will ensure that doors and drawers (where applicable) will be square within the frame. There is a small amount of final adjustment within door and drawer components if necessary after installation - see details below.

Step13

It is very important to ensure that the unit is level & plumb, using a spirit level. This will ensure that doors and drawers (where applicable) will be square within the frame.
